## 1st Inversion b3 b5 1

A Go board diagram illustrating a local variation. It shows a 7x7 grid of points. Three stones are placed: one at point b3 (top row, third column from the left), one at point b5 (third row, fifth column from the left), and one at point b7 (bottom row, seventh column from the left). The points are labeled with lowercase letters (a through g) for rows and numbers (1 through 7) for columns, starting from the bottom-left corner.

## 2nd Inversion

A 6x6 grid with 36 small squares. Three squares are highlighted with circles and numbers: one at the top center labeled 'b5', one at the middle right labeled 'b3', and one at the bottom center labeled '1'.
